Thanks Jana - I am on the list-serv and attended the last webinar. The next one sounds interesting as well.

Hey Rochelle –

You probably know about this, but thought I would share. Pretty interesting set of webinars on Puget Sound nutrients by ECY.

Jana

**Subject:** March 6 Nutrient Forum registration is open

Greetings,

Thanks to all who attended our February 6 Forum. Our next Puget Sound Nutrient Forum is quickly approaching and is on March 6, from 10am-3pm. The Forum will focus on Nutrient Management in Other States and will take place at the [Lacey Community Center](#). We will have guest speakers from the Long Island Sound, Chesapeake Bay, and San Francisco Bay. **Please RSVP for the March 6 Forum [here](#).**

The goal of the March 6 Forum is to learn how other state agencies and organizations are managing nutrients in their coastal estuaries. Our guest speakers will explain their state's nutrient management plans, followed by a panel discussion to answer questions and discuss how other state's strategies may apply to the Puget Sound Nutrient Source Reduction Project. We are excited to host the following speakers:

- Rowland Denny from the Connecticut Department of Energy and Environmental Protection will present on the **Long Island Sound** TMDL process and their state-managed water quality credit training program.
- Allan Brockenbrough from the Virginia Department of Environmental Quality will present on nutrient management in the **Chesapeake Bay**, how they work with point vs. non-point sources of nutrients, and their water quality trading program.
- David Senn from the San Francisco Estuary Institute will present on nutrient management in the **San Francisco Bay**, their nutrient monitoring, and how they are preparing for future scenarios and population growth.
- Our panel discussion will include our guest speakers, as well as Department of Ecology staff.

We will send you a follow-up email with the draft agenda and look forward to seeing you on March 6. Thank you for your engagement in this important work.

**Dustin Bilhimer, PSNSRP Project Manager**
